Unit 7 ART

主题素养积累

She is widely seen as proof that good looks can last forever. But at nearly 500 years of age, time is catching up with *Mona Lisa*.

The health of the famous picture, painted by Leonardo da Vinci in the early 16th century, is getting worse by the year, according to the Louvre Museum (卢浮宫博物馆) where it is housed.

"The thin, wooden panel on which *Mona Lisa* is painted in oil has changed shape since experts checked it," the museum said. Visitors have noticed changes but repairing the world's most famous painting is not easy. Experts are not sure about the materials the Italian artist used and their current chemical state.

Nearly 6 million people go to see *Mona Lisa* every year, many attracted by the mystery of her smile. "It is very interesting that when you're not looking at her, she seems to be smiling, and then you look at her and she stops," said Professor Margaret Livingstone of Harvard University. "It's because direct vision (视觉) is excellent at picking up the detail, but less suited to looking at shadows. Da Vinci painted the smile in shadows."

However, the actual history of *Mona Lisa* is just as mysterious as the smile. Da Vinci himself

planned to return it to Italy. The painting was sent back to France two years later. After decades, the French hid the painting in small towns to keep it out of the hands of German forces.

[2025·北京东城区高一下期末]

Lila and Maya were inseparable seniors at Riverside High. They'd been friends since age 8. Lila, a quiet artist, spent lunch breaks sketching (画速写) in her notebook; Maya, the school running star, often joked with her, "One day, I'll be in your famous art exhibit, right?"

One Monday, Lila's notebook disappeared from her locker. It held years of sketches, including a deeply personal series about her mum's battle with cancer. Maya promised to help find it, but two days later, the school gossip blog, *Riverside Confessions*, posted a photo of one of Lila's sketches: a raw drawing of a weak and bony woman lying in a hospital bed, captioned, "Does Lila's mum look horrible?"

Lila was extremely shocked and sad. It seemed everyone was whispering about her. Maya went up and tried to comfort her, but Lila couldn't take it anymore and exploded, "You're the only one who knew about that sketch." Maya froze, said nothing, and then fled.

That night, Maya showed up at Lila's door, in tears. The truth spilled out: Maya had stolen the notebook "just to look". However, all this was chanced to be seen by Jake, who ran the gossip blog. When Jake threatened to report her, Maya was extremely scared and gave the notebook to him. "I'm so sorry," Maya said in tears. "I was stupid and jealous... I hated

that you had something so meaningful, and I felt like my life was just track.”

Lila was boiling with anger. But as Maya trembled at her doorway, Lila remembered all the times Maya had stood by her—when her mum was diagnosed (确诊); when she was unhappy at school. Being cheated hurt, but so did losing a friend.

The next day, Lila marched to Jake, together with Maya. They demanded he take down the post and apologize. When Jake refused, Maya did something unexpected: she apologized over the school radio station. “I broke my best friend’s trust, and it was unforgivable,” she said, voice shaking. “Lila’s art isn’t ‘horrible’—it’s brave. And I’m sorry I forgot what real friendship means.”

Jake was punished by the school and the blog lost followers. Lila’s art teacher, inspired by her sketches, helped her turn the cancer series into a gallery show at the local library. At the opening, Maya stood by her side, holding a sign that read, “My best friend is a talent.”

- ()1. What do we know about Lila and Maya?
- A. They shared the same locker at school.
- B. They planned to hold an art exhibit.

Art comes in two main categories: realistic

and abstract. Realistic art aims to show real-life scenes, people, and objects exactly as they appear. It involves paying close attention to details, making things look like photographs. 1. _____. It’s more about expressing feelings, emotions, and ideas.

Realistic art is easy to understand. Viewers can easily recognize what is portrayed. Take the *Mona Lisa* for example—it’s a realistic painting of a lady with a mysterious smile. 2. _____, helping us to learn about the past.

Unlike realistic art, abstract art is more about being creative. 3. _____. They use shapes, colours and patterns to express feelings and ideas. Abstract art means different things to different people. Some people enjoy trying to figure out what the artwork conveys.

4. _____. Realistic art needs precision in drawing or sculpting to make things look real. Abstract art requires imagination to use shapes and colours in new ways. Many artists are skilled in both. They create realistic pieces to demonstrate their technical skills and abstract ones to display their creativity.

As for personal preference, some people prefer the clear stories of realistic art while others are attracted to the mystery of abstract art, interpreting meanings in the shapes and forms. Together, the two kinds of art make the art world diverse and engaging. 5. _____.

- A. Both types of art take skills to make
- B. Photographs preserve faces of folks from long ago
- C. Grasping abstract art demands more artistic training
- D. Both ways of creating art have their own value and beauty
- E. In contrast, abstract art focuses less on realistic appearances
- F. Artworks like this tell stories about history and everyday life
- G. Artists have the freedom to go beyond real-life representations

Photography is more than an art form; it can also serve as a powerful therapeutic (治疗的) tool. Photo Therapy and therapeutic photography are gaining recognition for their potential to support emotional processing, self-expression, and mental health. 1. _____.

Photo Therapy refers to the structured use of photographs in a professional counseling (咨询) setting. Therapists guide clients through interactions with personal images, including family photographs, self-portraits, or even abstract visuals, to explore emotions and experiences.

The therapeutic process might include interpreting the symbolic meaning of a photo, discussing how it makes the client feel, or using it to explore relationships. 2. _____, as photographs can act as mediators (中介), allowing them to touch on challenging topics from a more comfortable distance and helping them uncover feelings and memories.

Unlike Photo Therapy, which requires a trained professional, therapeutic photography is an independent or group activity that anyone can engage in to support mental health. 3. _____. As noted on the Photo Therapy Centre website, capturing images encourages mindfulness, as it draws individuals into the present moment and helps them focus on their environment.

The act of creating can also help people process their emotions and tell their stories. 4. _____, which allows individuals to share feelings they may struggle to express in words. Engaging in photography can build confidence and self-awareness, giving individuals a sense of achievement as they create something visible and meaningful.

Whether guided by a therapist or pursued independently, photography is an accessible way to support well-being. 5. _____. For those looking forward to exploring their emotions or seeking new paths to self-discovery, picking up a camera might be the first step towards a brighter and healthier future.

- A. These approaches are closely related
- B. Some clients tend to hide their memories
- C. It bridges the gap between art and mental health
- D. Using a photo for conversations gives clients a sense of safety
- E. A famous blog highlights how photography can serve as a visual journal
- F. This approach involves taking photographs or creating photo-based projects
- G. While they sound similar, they have distinct applications that make them uniquely beneficial

❶ 阅读理解(每小题 2 分, 满分 16 分)

A [2025·北京海淀区高一下期末]

It all started on the day I was binge-watching a talk show in which the host uttered these wise

words: "School in Shakespeare's day and age was vastly different from our own. In fact, it was far easier because students didn't have to study Shakespeare." I laughed when I heard

this statement and then realized how rightful the claim is. I mean, most of us were not enthusiastic when we saw the name Shakespeare in a lesson or an assignment title, even for someone who enjoys reading, analysing pieces of literature, and writing.

It's pretty obvious that the manner in which the current school system handles art affects most students' understanding of it. When we are given a certain assignment based on, let's say, a play, many of us subconsciously connect our experience and opinion with that play based on how good or bad the process of completing that assignment was, especially if that was the first time we ever watched or read it. We stop appreciating the work in front of us and start choosing to notice only the elements necessary to help us complete that assignment. The beauty, joy, or even awe of reading and watching that play no longer exists.

Art is subjective. Each individual has a unique understanding of it. The features that make an artwork excellent are how well the piece succeeds in attracting us with its idea, how it affects us emotionally, and what we experience during our interaction with it. To have that free interaction removed will not only hurt the piece but also how students will engage with similar works in the future.

One of the fundamental solutions is to embrace the individuality that art brings—the liberty for a person to understand and interact with a piece through the lens of experiences lived, ideas absorbed, and emotions felt. Just like anyone, students are human beings.

By nature, classes and courses must have structure. Hence, it would be complicated if we leave total freedom to students. Therefore, we could have a theme, topic, or style for each lesson rather than assigning the same text to all of the students. Based on the theme or topic of the lesson, the students would freely choose a

piece of their liking to engage with. Doing so is not just another assignment but an extension of their interaction with an artwork.

Art is a reflection of the human experience. To quote from John Keating, played by the great Robin Williams: “We read and write poetry because we are members of the human race. And the human race is filled with passion.” That is true for all forms of art. By changing the way that art is taught in schools, we can help students to see art as a valuable and enjoyable part of their lives. Ultimately, the goal of art education should be to help students develop a lifelong appreciation for art.

- () 1. The author thinks when learning Shakespeare's works in class, students will probably _____.
A. experience joy in analysing them

Few would question that arts, in its massive forms and media, are like a mirror that reflects the social, cultural, economic or even political situation of a society of a particular era. However, beyond being simply an illustration of the human condition, arts can be vital in pushing the country forward culturally and economically.

Without doubt, arts are important for the progress of society. They enable individuals to develop on the whole and deepen the social ties in communities by gathering people to create, experience and enjoy art together, which can be seen from traditional ethnic dances to interactive theatre performances. Beyond material wants and needs, human beings find fulfilment in experiencing and expressing things of remarkable value through arts. Meanwhile, strong citizens' participation in arts also strengthens the social fabric of a nation.

Moreover, arts enable a nation to progress in human rights and values. As powerful media that are able to stir hearts and cause reflection, arts can speak up the human voice of criticism sharply and clearly in times of crisis, and call upon society to seek the common good. It is evident that arts, which express human values and emotions, can constitute a profound way of promoting human dignity and additionally, form the barrier of the ethical and moral life of society.

More often than not, a booming arts scene may not narrow the rich-poor divide. It's not hard to see that in a highly competitive world, it is essential for governments to prioritize the development of a strong workforce and the building of sustainable industries. However, arts may well complement (补充) economic policies as arts encourage individuals to exercise creativity. As Albert Einstein stated, imagination is more important than knowledge. While

knowledge and professional skills may stimulate a country's development, the ability to innovate and think out of the box may be valuable to a society facing ever new and unpredictable challenges.

While the importance of arts may differ from country to country, depending on its economic circumstances and the socio-political issues, the importance of arts to the progress of a nation should not be overlooked.

- ()5. What's the first paragraph mainly about?
A. The forms of arts.
B. The functions of arts.
C. The definition of arts.
D. The development of arts.
- ()6. How do arts influence human rights and values?
A. By reflecting humans' views.
B. By pointing out the common good.
C. By giving people a sense of fulfilment.
D. By forming the moral standard of society.
- ()7. Why is Albert Einstein mentioned in Paragraph 4?
A. To praise Albert Einstein's achievements.
B. To call on humans to remember our history.
C. To stress the importance of arts in creativity.
D. To show the necessity of knowledge and skills.
- ()8. What will the author probably agree with?
A. Arts serve as the major influence in values.
B. Arts play an important part in the progress of a country.
C. Arts should aim at strengthening social bonds.
D. Arts can bridge the gap between rich and poor.

When you go to concerts, you expect your favourite musician to perform amazingly on stage. But you may have noticed something curious that most musicians don’t just play with their fingers. They also involve body movements that fit the song’s beat or dance following the music. 1. _____ The facial expressions musicians show when playing may seem strange or crazy to an outsider, but all that pulling faces might actually serve a purpose.

Firstly, playing a musical instrument usually requires intense focus and concentration. 2. _____ Their facial expressions can be a demonstration of the intense emotions and physical effort that go hand-in-hand with musical performance. They’re often subconscious—in fact, many of us will pull strange faces when

we’re deeply involved in an activity we care about. 3. _____ Musicians have a strong emotional connection with the music they perform. They often use their facial expressions to express the mood and interpretation of the music, which creates a more engaging musical experience. While facial expressions may not directly make someone a better musician, they might contribute to the overall artistry of the music.

Performing live music is a rather stressful experience, so it could be that the performer is expressing those nerves through their face—biting the bottom lip, for example. Luckily, nerves will often go away soon after a musician starts performing. 4. _____

The facial expressions obviously to some extent express the performer’s inner world. Another interesting thing is that making facial expressions can have a physiological impact on the musician’s performance. Some research suggests that certain facial movements can activate specific muscles and improve muscle harmonization. 5. _____ However, it’s important to note that this relationship is still not well understood, and the extent to which facial expressions directly impact musical competence is a subject of ongoing investigation.

- A. When you’re really focused, you don’t care about the outside world.
- B. Among them the part of the body that best exhibits this is obviously the face.
- C. They likely won’t be the main cause for those strange faces throughout a performance.
- D. Such effects are particularly helpful in controlling muscles when playing an instrument.
- E. Facial expressions can also help musicians communicate emotions and artistic expression.
- F. Musicians are often overcome with emotion from the music itself or the reaction of the crowd.
- G. Musicians often enter a state of “flow”, where they become completely absorbed in the music they’re creating.

A [2023·北京师范大学附属中学高一下期中]

The question of whether it is possible to dissociate the artist from their work has been debated for a long time. Even though positive critical reviews about an artist's behaviour can

improve their artistic accomplishments, people should treat artists as individuals who have lived apart from their work.

One of the reasons is that even artists have shortcomings. Like any other human being, an artist can err, and we cannot be severely

judgemental of every person that falls into error. Cancel culture with endless criticism is concerned more with how we should disregard the artists when they make mistakes than with how their weaknesses can be used by the artists to create art that is unique.

Perhaps Kevin Hart's words support this thought. He asks, "When did we get to a point where life was supposed to be perfect? Where people were supposed to operate perfectly all the time?" When people start seeing artists as human beings, they'll see them for who they are and review their behaviour not on the basis of their art but on the basis of their humanity.

It should be also noted that there are works of art that are inspired by the artist's experience. For example, the themes in the *Harry Potter* books are so connected with J.K. Rowling's wicked worldview that it is virtually impossible to distinguish the two from each other. Since canceling artists based on their worldview would mean the reception to their art will suffer, artists become tense and unwilling to express themselves, which will kill creativity, eventually leading to the death of art. Comedians, singers or painters who should be integrating contemporary issues with their works become boring, and art stops functioning as the social mirror it ought to be.

An artist who makes mistakes still has art with intrinsic (内在的) value, benefiting entire communities or cultures. For instance, when Kendrick Lamar launched his album and frequently used the F-slur in one of his songs, there was much-heated discussion. He was entirely mistaken in using the F-slur, but as an artist, he still had a wide-reaching impact on society. Similarly, one can respect the late Michael Jackson because of how he impacted pop music and the inclusion of black musicians in mainstream media despite his

personal weaknesses, opinions, worldviews and associations.

While these artists may engage in their terrible behaviour, the art they produce today may serve as an example for others to produce outstanding work in the future. Some would refer to this process as a cycle. Good art should, therefore, be judged due to its value and not the value of the artist.

- () 1. Which would Kevin Hart probably agree with?
- A. People should perform perfectly all the time.
 - B. Artists' shortcomings might be their inspiration.
 - C. If artists have weaknesses, we'd better cancel them.
 - D. Artists should be evaluated based on their humanity.
- () 2. Why will "cancel culture" lead to the death of art?
- A. Artists will be unwilling to create any artwork.
 - B. Artists will stop concerning themselves with contemporary issues.
 - C. Artists will lose their desire for expression and creativity.
 - D. Artworks are unavoidably inspired by artists' experiences.
- () 3. How can an artist with mistakes benefit others?
- A. The artist may make some new words popular.
 - B. The artist's opinions may provoke heated discussion.
 - C. The artist will benefit entire communities or cultures.
 - D. The artist's art may give others ideas of artistic creation.

B [2024·中国人民大学附属中学高一下期中]

Mime (哑剧) opens up a new world to the beholder, but it does so insidiously (隐匿地), not by purposely injecting points of interest in the manner of a tour guide. Audiences are not unlike visitors to a foreign land who discover that the modes, manners, and thoughts of its inhabitants are not meaningless oddities, but are sensible in context.

I remember once when an audience seemed puzzled at what I was doing. At first, I tried to gain a more immediate response by using slight exaggerations. I soon realized that these actions had nothing to do with the audience's understanding of the character. What I had believed to be a failure of the audience to respond in the manner I expected was, in fact, only their concentration on what I was doing; they were enjoying a gradual awakening—a slow transition of their understanding from their own time and place to one that appeared so unexpectedly before their eyes. This was evidenced by their growing response to succeeding numbers.

Mime is an elusive art, as its expression is entirely dependent on the ability of the performer to imagine a character and to recreate that character for each performance. As a mime, I am a physical medium, the instrument upon which the figures of my imagination play their dance of life. The individuals in my audience also have responsibilities—they must be alert collaborators. They cannot sit back, mindlessly

self-content, and wait to have their emotions aroused by fantastic musical sounds or visual rhythms or acrobatic feats, or by words that tell them what to think. Mime is an art that, paradoxically, appeals both to those who respond instinctively to entertainment and to those whose appreciation is more analytical and complex.

Between these extremes lie those audiences conditioned to resist any collaboration with what is played before them, and these the mime must charm despite themselves. There is only one way to attack those reluctant minds—take them unaware! They will be delighted at an unexpected pleasure.

- ()5. The author most likely includes the incident described in Paragraph 2 in order to _____.
A. show how challenging the career of a mime can be
B. eliminate some misconceptions about what a mime is like
C. portray the intensity required to see the audience's point of view
D. indicate the adjustments an audience must make in watching mime
- ()6. The underlined word “elusive” in Paragraph 3 most probably means _____.
A. easy to summarize
B. difficult to define
C. hard to comment
D. natural to imitate
- ()7. According to the passage, which of the following is important to the artistic success of mime?
A. Various dramatic elements.
B. Realistic details.
C. Audience involvement.
D. Large audiences.
